

CORPORATE SECURITY

Start Date:	24/08/2025	End Date:	28/08/2025
Categories:	HSSE	Venues:	Dubai
Formats:	In Person	Instructors:	

OVERVIEW

This course introduces participants to the fundamental principles of corporate security management, focusing on safeguarding people, assets, operations, and information. Participants will learn how to design and implement effective security strategies, conduct risk assessments, manage incidents, and align security practices with corporate objectives and compliance requirements.

OBJECTIVES

By the end of this course, participants will be able to: – Understand the key concepts, roles, and responsibilities in corporate security management. – Conduct threat assessments and vulnerability analyses to identify security gaps. – Design and implement physical and operational security systems. – Develop incident response protocols and investigation procedures. – Integrate corporate security programs with business continuity and risk management frameworks.

COURSE OUTLINE

1- Introduction to Corporate Security Principles and Objectives 2- Threat Assessment, Vulnerability Identification, and Risk Analysis 3- Designing Physical Security Systems and Access Control Mechanisms 4- Incident Management, Reporting, and Investigations 5- Integrating Security into Corporate Governance and Risk Management

TARGET AUDIENCE

Security Officers, Facility Managers, Risk Managers, Compliance Professionals, Operations Managers, and any professionals responsible for or involved in protecting corporate assets, personnel, and operations.

METHODOLOGY

The course combines interactive lectures, security audits, case study analysis, practical exercises, group discussions, and tabletop simulations to ensure participants gain both theoretical knowledge and practical skills in corporate security management.

CONCLUSION

Upon completing this course, participants will have a solid understanding of corporate security fundamentals and the ability to design and manage security programs that protect organizational assets and support business resilience.

DAILY AGENDA

Day 1: Introduction to Corporate Security Frameworks

Review corporate security goals, structures, governance, and the evolving threat landscape affecting organizations.

Day 2: Threat Assessment and Risk Analysis Techniques

Learn how to conduct systematic threat assessments, vulnerability analyses, and prioritize risks to organizational operations.

Day 3: Designing and Implementing Physical Security Systems

Explore best practices in access control, surveillance systems, perimeter security, and protective technologies.

Day 4: Incident Management and Investigations

Develop incident reporting procedures, investigation methods, and protocols for handling internal and external security events.

Day 5: Integrating Security into Corporate Strategy

Align corporate security programs with enterprise risk management, business continuity planning, and compliance standards.
