OVERVIEW

This course explores the ethical dimensions of emerging technologies and innovation. Participants will examine how to innovate responsibly by considering societal impact, bias, privacy, and long-term consequences.

OBJECTIVES

By the end of this course, participants will be able to:

- Evaluate ethical risks in AI, automation, data use, and product design.
- Apply frameworks to balance innovation speed with accountability.
- Ensure transparency, fairness, and privacy in innovation processes.
- Promote ethical reflection in product teams, R&D, and leadership.
- Build governance systems that anticipate ethical challenges.

COURSE OUTLINE

1- Innovation with Impact: Navigating Ethical Frontiers
2- Bias, Privacy, and Safety in Tech-Driven Solutions
3- Governance and Accountability in Emerging Innovation
4- Stakeholder-Centered Design for Innovation Ethics
5- Future-Proofing with Ethical Foresight

TARGET AUDIENCE

Innovation leaders, product managers, data teams, engineers, legal and risk officers, and executives in fast-growth sectors.

METHODOLOGY

Ethical foresight labs, innovation impact mapping, bias and risk audits, scenario analysis, and group design challenges.

CONCLUSION

Participants will leave with a structured approach to embed ethics into innovation pipelines and guide responsible growth.
