

RELIABILITY-CENTERED MAINTENANCE (RCM) IN OIL & GAS

Start Date:	23/11/2026	End Date:	27/11/2026
Categories:	Oil & Gas	Venues:	Milan
Formats:	In Person	Instructors:	

OVERVIEW

This course introduces the RCM methodology for identifying critical equipment functions, failure modes, and developing cost-effective maintenance strategies. It provides tools for improving asset reliability and performance in oil & gas operations.

OBJECTIVES

By the end of this course, participants will be able to:

- Understand the principles and steps of the RCM process.
- Identify critical systems and assess failure risks.
- Develop functional failure analysis and maintenance tasks.
- Select the optimal strategy: predictive, preventive, or run-to-failure.
- Enhance asset performance and optimize lifecycle cost.

COURSE OUTLINE

1. Introduction to RCM and Asset Reliability
2. Functional Failure Analysis and FMEA
