COST ACCOUNTING FOR OPERATIONAL CONTROL

Start Date:	18/10/2026	**End Date:**	22/10/2026
Categories:	Finance & Accounting	**Venues:**	Dubai
Formats:	In Person	**Instructors:**	

OVERVIEW

This course equips professionals with cost accounting techniques to drive operational control and efficiency. Participants will learn how to monitor costs, allocate resources, and use cost data to support decision-making.

OBJECTIVES

By the end of this course, participants will be able to: – Understand the principles and methods of cost accounting. – Track, classify, and allocate costs across departments or projects. – Use cost-volume-profit analysis and break-even points for planning. – Identify areas of waste, inefficiency, and opportunity. – Apply cost insights to improve pricing, production, and budgeting.

COURSE OUTLINE

1- Foundations of Cost Accounting and Cost Classifications 2- Cost Behavior, Allocation, and Job/Process Costing 3- CVP Analysis and Break-Even Planning 4- Using Cost Data to Improve Efficiency and Performance 5- Costing in Action: Reporting, KPIs, and Case Work

TARGET AUDIENCE

All Supervisory Levels, Finance professionals, cost controllers, plant managers, operations leaders, and analysts.

METHODOLOGY

Calculation drills, budgeting workshops, costing method simulations, and operations case reviews.

CONCLUSION

Participants will leave with practical tools to manage, report, and optimize operational costs across departments or business units.

DAILY AGENDA

Day 1: The Role of Cost Accounting

Understand why cost accounting matters for performance and control.

Day 2: Tracking & Allocating Costs

Learn how to classify and assign costs accurately to departments or jobs.

Day 3: Planning with CVP Analysis

Use break-even tools to support pricing and capacity decisions.

Day 4: Using Cost Data Effectively

Connect cost reports to operational improvements and strategy.

Day 5: Controlling Costs in Practice

Build cost reports, track KPIs, and simulate decision-making based on real cost data.
