ERP IMPLEMENTATION STRATEGIES

Start Date:	17/01/2027	**End Date:**	21/01/2027
Categories:	Finance & Accounting	**Venues:**	Dubai
Formats:	In Person	**Instructors:**	

OVERVIEW

This strategic program equips professionals with the methodologies, tools, and insights required for successful ERP system implementation. It focuses on planning, stakeholder management, change readiness, process mapping, and ensuring post-implementation sustainability.

OBJECTIVES

By the end of this course, participants will be able to: – Understand ERP lifecycle phases and success factors. – Align ERP implementation with business goals and processes. – Manage cross-functional stakeholders and resistance. – Design process maps and gap analyses for modules. – Ensure adoption through training, testing, and post-go-live support.

COURSE OUTLINE

1- ERP Fundamentals and Lifecycle Phases 2- Implementation Planning and Stakeholder Engagement 3- Process Mapping and Business Requirements Gathering 4- Change Management and Training Design 5- Post-Implementation Support and Optimization

TARGET AUDIENCE

All Supervisory Levels, IT managers, project leads, functional consultants, finance managers, and business process owners involved in ERP projects.

METHODOLOGY

ERP simulations, change workshops, implementation case reviews, and planning toolkits.

CONCLUSION

Participants will leave with a structured implementation roadmap, risk mitigation approaches, and strategies to drive ERP success across departments.

DAILY AGENDA

Day 1: ERP Overview and Strategic Fit

Discuss ERP system purpose, benefits, and aligning platform with organizational needs.

Day 2: Planning and Engagement

Explore stakeholder mapping, resource allocation, and risk management.

Day 3: Process Mapping and Customization

Learn how to document workflows, identify gaps, and scope business needs.

Day 4: Change Management and Testing

Develop communication strategies and conduct user acceptance testing.

Day 5: Sustainability and Go-Live Support

Build post-launch support plans, system evaluation, and optimization pathways.
